

Taurus 3 Ring Saw

The new and improved Taurus 3 Diamond Ring Saw is a unique glass saw that will have you cutting glass like a pro! The diamond-coated stainless-steel ring blade will cut glass in ANY direction, forward, backward, or sideways!

The 11" x 16" work surface offers plenty of room for most glass projects but for larger pursuits, the ring saw easily detaches from the table base to use as a handsaw allowing you to cut out any glass shape with confidence regardless of the size!

Safe to operate, the diamond ring blade will NOT cut your fingers, but slices through glass, ceramic, metal, and tile "like budda." The Taurus 3 also comes with a built in spot light and face shield, as well as an amusing yet very informative DVD that shows you how to care for your ring saw.

The Gemini Saw Company, manufacturer of the Taurus 3 Ring Saw, provides a three year warranty on the saw and all of its component parts (wear parts which include, the blade, bearings, drive belt and grommets, spot light and face shield are not covered under the warranty).

Please note that the Taurus Ring Saw will ship via USPS Parcel Post. If you wish to have expedited delivery, please contact the Lassés at twolassesglass@yahoo.com. Expedited delivery fees will be the responsibility of the customer.
