

Cheap Glass Glue!

Whenever the Lasses are in a “sticky wicket” they rely on Elmer’s Blue School Glue GEL! Yes, the Lasses have found that a little dab of blue glue GEL applied sparingly with a toothpick, does a wonderful job of steadying a stack of glass prior to firing. Best of all, the lasses have found that the heavier, gel consistency means the glue goes EXACTLY where you want it and STAYS there! True, there are a number of excellent glass glue products on the market, but the Two Lasses are “sticking” with Elmer’s Blue School Glue GEL. Go ahead, give it a try, you WON’T be disappointed!
