

Jen-Ken Take-A-Part "CRE-8" SQUARE Fusing and Bead Annealing Kiln WITH EXTRA 4.5" Collar Featuring 2" flip door

The Jen-Ken "Cre-8" SQUARE Glass Fusing & Bead Annealing Kiln features the NEW Orton AF3P Pre-Programmed One Smart Digital Controller and FOUR completely separate, stackable sections to set up in any configuration that you wish! One of the removable collars features a 2" flip door that makes it a snap to anneal beads on mandrels or insert glass pieces on punties! With all four sections in place you have an overall internal depth of 9 inches, allowing you to use bracelet-making mandrels to bend your glass with EASE!

This multi-purpose kiln can be used for any number of glass slumping, draping, fusing and annealing projects from beads and jewelry creations to dishes, vases and tiles! With this wonderfully versatile kiln, there is NO limit to your creativity! The Jen-Ken Take-A-Part "CRE-8" SQUARE Fusing and Bead Annealing Kiln (WITH the additional collar featuring 2" deep flip door) typically retails for \$785.00 and up PLUS shipping!

DIMENSIONS:

INTERNAL: 8 inches square and 4.5 inches deep WITHOUT the collar in place, and 9 inches deep WITH the separate collar section in place.

EXTERNAL: approximately 18 inches across (including the controller box) x 13 inches across (at the point without the controller box) x 14 inches high WITH all four sections in place (when sitting without the kiln brick stand).

WEIGHT: When set-up with the kiln shelf and ALL four sections in place, about 45+ pounds. Shipping weight is approximately 55 pounds.

CONTROLLER: Orton AF3P Pre-Programmed One Smart Controller that features multiple pre-programmed schedules of up to EIGHT ramp/soak segments each in length as follows:

FOUR pre-set LARGE Piece Glass Firing Schedules to include Slumping/Draping, Tack Fusing, Full Fusing and Fire Polishing PLUS FOUR additional "OPEN" schedules

FOUR pre-set SMALL Piece Glass Firing Schedules to include Slumping/Draping, Tack Fusing, Full Fusing and Fire Polishing PLUS FOUR additional "OPEN" schedules

FOUR pre-set BEAD ANNEALING Schedules to include Small Moretti, Large Moretti, Borosilicate and Batch Annealing PLUS FOUR additional "OPEN" schedules

FIVE pre-set PRECIOUS METAL CLAY Firing Schedules to include Fast Fire PMC+, Slow Fire PMC+, Slow Fire PMC3, PMC Standard and PMC Gold PLUS FOUR additional "OPEN" schedules

CERAMIC CONE FIRING pre-set Firing Schedules from Cone 022 through 6 PLUS FOUR additional "OPEN" schedules

****NOTE:** Using any of the ceramic cone firing schedules you will ONLY be able to fire as high as the MAXIMUM firing temperature of this glass kiln, which would be 2000F WITHOUT the flip door collar section in place, and 1600F WITH the flip door collar in place.**

Skip Step, Add Time, Add Temperature and Ramp and HOLD capabilities are also built into this fabulous controller, along with a Power Failure Resume feature.

ELECTRICAL: The Jen-Ken Cre-8 Fusing & Bead Annealing Kiln with 4.5 inch removable collar that features a 2" flip door uses standard 120 volt, 13 amp household current -- NO rewiring needed! It has a three-prong plug and 8 foot power cord.

MAXIMUM FIRING TEMPERATURE: 2000F WITHOUT flip door collar section in place, and 1600F WITH all four sections in place.

INCLUDES: This versatile kiln includes everything you need to begin fusing and annealing! One 7" Square Kiln Shelf, Three 1/2" Kiln Posts, One Bag of Kiln Wash, Instruction Manual and Two Base/Foundation Bricks on which to set the kiln.

FEATURES:

Recessed, side firing elements mounted high on the kiln wall for added safety (you do NOT need or want heating elements in the lid of a kiln of this size)!

Each section has heavy duty handles for ease in portability.

The lid of this kiln has been sealed with a high temperature coating to prevent the fire brick from "shedding" on to your glass projects.

Flip door measuring 2" x 6" for ease in annealing beads on mandrels or inserting glass pieces on punties.

This kiln is constructed of fire brick rated to 2400 degrees Fahrenheit with a maximum heating temperature of 2000 degrees Fahrenheit.

SHIPPING: This Jen-Ken kiln is built-to-order. Your kiln will ship within four weeks of payment, often much sooner, direct from the factory via UPS Ground services. We will need your daytime phone number for shipping purposes. Shipping charges are \$60.00 anywhere in the lower 48 states. Those customers residing in Hawaii and Alaska will need to contact the Lasses for additional shipping charges at twolassesglass@yahoo.com.
